Profile Summary

BSc (Hons) Software Engineering undergraduate at the Sri Lanka Institute of Information Technology (SLIIT) with hands-on experience in full-stack development using React, Next.js, Java, Spring Boot, and .NET. Seeking an IT internship to apply software development skills, contribute to real-world projects, and gain practical industry experience.

Core Competencies

- React.js
 - Next.js
 - Spring Boot
 - Node.js, Express
 - .NET
 - Tailwind CSS
 - Framer Motion
 - JavaScript
 - MySQL
 - MongoDB
 - Neon
 - REST APIs
 - Open Router
 - Vapi AI
 - Assembly AI
 - Git
 - Clerk API
 - Clerk Billing
 - JWT, Authentication
 - Agile, Jira
 - UI/UX, Figma
 - HTML CSS, PHP
-

Education

BSc (Hons) Software Engineering - 2023 to Present
Sri Lanka Institute of Information Technology (SLIIT)

GCE A/L (Biology Science Stream) - Successfully Completed
Mahanama College, Colombo 03

Certificates

AI/ML Engineer - Stage 2 Dec 2025
Sri Lanka Institute of Information Technology (SLIIT)
Credential ID: 89gd31dev0

MongoDB Atlas Administrator Path Oct 2025
MongoDB
Credential ID: MDB7s8fzstul4

Projects

Medical AI Voice Agent

- Created an AI-powered Medical Voice Agent that enables patients to interact with AI doctors, manage medical sessions, and access personalized health dashboards.
- Orchestrated real-time voice interaction workflows supporting speech input/output, session history tracking, and AI-driven medical consultations with secure authentication and subscription billing.
- Integrated a full-stack system using **Next.js**, **React Server/Client Components**, **Tailwind CSS**, **PostgreSQL (Neon/Drizzle)**, **Clerk Authentication and Billing**, **Open Router**, **Assembly AI**, and **Vapi AI**, **Shadcn UI**

KDS e-Office Service – Digital Task Management & Citizen Service Platform

- KDS e-Office Service is a scalable digital system for the **Karuwalagaswewa Divisional Secretariat (KDS)**, designed to digitize manual administrative workflows and citizen services using **ASP.NET Core (.NET 10)**.
- Implemented RESTful endpoints with Swagger, task & letter management, visitor handling, and role-based access control.
- Optimized database operations with SQL Server, stored procedures, and Repository Pattern, ensuring transactional safety and maintainability.
- Built React, TypeScript and Vite frontend with HMR, ESLint, and type-safe configuration for seamless integration with the backend.
- Tech Stack: **ASP.NET Core**, **.NET 10**, **SQL Server**, **Repository Pattern**, **Swagger**, **React**, **TypeScript**, **Vite**

BuildSafe - AI-Based Infrastructure Risk Assessment App

- Launched “BuildSafe,” an AI-supported mobile application for pre-construction infrastructure risk assessment to reduce site accidents and improve safety decision-making.
- Built offline-capable digital inspection forms with automatic GPS capture covering 7+ structural parameters across two infrastructure types.
- Designed a compliance scoring system aligned with IBC, NFPA, and AASHTO-LRFD standards using a 0–100 risk scale with three severity tiers.
- Developed a risk analytics module integrating real-time weather data, structural compliance results, and an AI recommendation engine (Gemini) to generate actionable mitigation strategies.
- Tech Stack: **React Native**, **Node.js**, **Express.js**, **MongoDB**, **AsyncStorage**, **GPS Services**, **Open Weather API**, **Gemini API**.

Repository: <https://github.com/Yrukshan/BuildSafe-App>

Silk & Shine - Salon Management System

- Delivered a web application to digitize salon operations, enabling role-based access, online appointment booking, staff and service management, and financial tracking.
- Engineered core modules for staff scheduling, service catalogs, and revenue tracking to streamline operational workflows.

• Tech Stack: **React.js, Spring Boot, MySQL, JIRA, GitHub, Postman.**

Repository: <https://github.com/Yrukshan/Silk-Shine-Salon-Management-System>

biteCloud - Food Order System

- Developed a Java web application for managing food items, customer orders, sellers, and admin operations with full CRUD functionality.

• Streamlined end-to-end order management workflows.

• Tech Stack: **Java (JSP/Servlets), JDBC, MySQL, HTML, CSS, JavaScript.**

Repository: <https://github.com/Yrukshan/Food-Order-System-JAVA-PROJECT-WEB-SITE->

Soft Skills

Problem solving, Team working, Adaptability, Good communication
